Trefny Center
Summer 2019 Events

Course Design Institute (CDI): May 13—17
During the Course Design Institute, participants will learn about principles of course design and new pedagogical techniques. We will focus on the development and alignment of learning outcomes, course activities, and assessments. The topics discussed in the CDI can be applied to individual class sessions, course modules, and entire courses. Apply by April 8 at 5 pm! For more information, go to: tinyurl.com/CourseDesign2019.

Teaching as Research (TAR) Institute: May 28—30
During the Teaching as Research Institute, participants will learn how to investigate questions about student learning, motivation, or beliefs in classroom settings. No prior experience with education research is necessary. Participating faculty who complete a study will be eligible for $1,000 in professional development funds. Apply by April 8 at 5 pm! For more information, go to: tinyurl.com/TeachingAsResearch2019.

Engineering Online Learning (EOL): May 13—June 16
EOL is a paced, asynchronous online course that allows you to experience online learning from the perspective of a learner as you work through the design of your own online course. Completion of this course is required before building or teaching an online course at Mines. Participation requires approximately 10 hours of effort each week, and we will offer $2,500 in professional development funds to selected faculty for successfully completing the EOL course. Register by May 6 at 5 pm! For more information, go to: tinyurl.com/EOLSummer2019.

Engineering Learning (EL) Conference: August 12
The fourth annual Engineering Learning Conference will be held on August 12, 2019 from 7:30 am — 5:30 pm in the Student Center. This year’s conference will share how people in our community have intentionally and effectively “engineered” learning to improve teaching and learning at Mines. For more information, go to: TrefnyCenter.mines.edu/ELConference.
